# Personalized Learning

## Personalized Learning is...

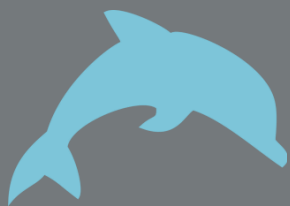

- ... student-centric.
- ... instruction tailored to individual student needs, interests, and abilities.
- ... varying the pace of coursework resulting in standards mastery.

## Fulton County...

- ... has committed to creating a student-centered culture and learning environment.
- ... has modeled this strategic initiative after other successful districts.

## At Dolvin Elementary...

- ... it will integrate project-based learning.
- ... students will be proactive in designing their own learning.
- ... students will decide how to demonstrate mastery and manage their educational experience.
- ... teachers will be trained to infuse strategies and technology to encourage deeper, more meaningful learning.

## Personalized Learning is...

- \* **Individualized** instruction and pace
- \* Considering and incorporating **student interests** and **experiences**
- \* Encouraging **critical thinking** and **problem solving**
- \* Promoting **collaboration**
- \* Incorporating different forms of **technology**

## Personalized Learning is not...

- \* A fad or trend that will go away soon
- \* Replacing teachers in classrooms
- \* Using only computers, iPads or other devices for learning
- \* Just ONE MORE THING in education
- \* Additional work for teachers
