Principles that guide our approach to Personalized Learning

Student-Centered Design

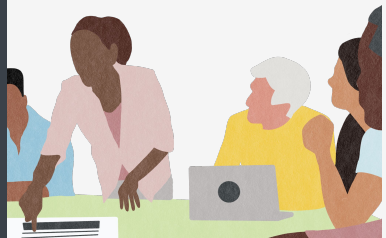
A student-centered approach to learning that calls on educators to be responsive to the needs of their students, ensuring they get the instruction they need, when they need it.

Nurturing Learning Environments

Developing nurturing learning environments (self-awareness, social awareness, strong relationships) creates the conditions to personalize learning for students.

Equity Focused

Equity provides a powerful reason to personalize learning for students, and it requires us to reimagine the systems that are not supporting the success of all students.



Data Informed

Organizations have deeply embedded practices and norms about how data is used. They take a holistic approach to data that is user-centered.

Education Elements

Objectives

- Share a variety of perspectives
- Promote conversations
- Discuss alignment with personalized learning
