Personalized Learning Summit 2017

@edelements

Time to Get Agile

Justin de Leon, Director of Product

Education Elements

bit.ly/PLSWorkshopSurvey

Gimme Shelter

"Our family of four needs a new home."

Actions:

Form groups of 3-5
 Build model of home w/paper, tape
 5 minutes

You learned something new:

"We live next to a river. Sometimes it floods in the area. We need the home to withstand flooding."

Take 2 minutes to improve the home.

You learned even more:

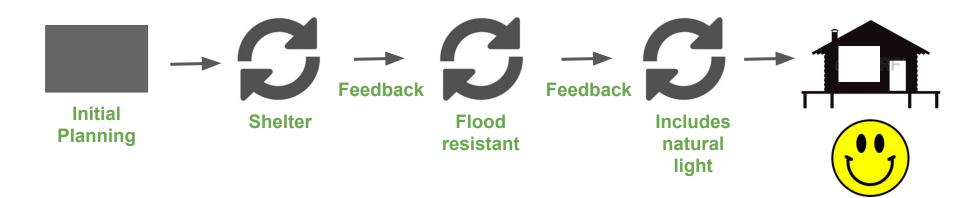

"Everyone in the family has a severe vitamin D deficiency. We need lots of natural light."

Take 2 minutes to improve the home.

Turn and talk

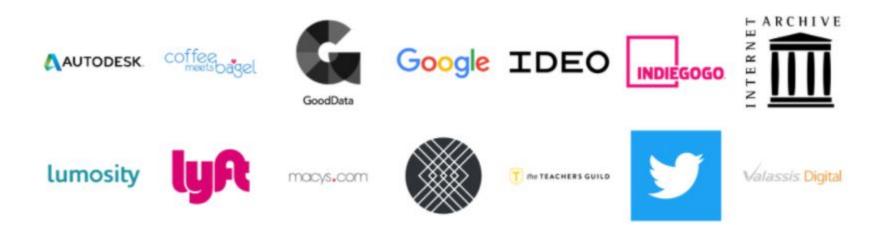

If you built the shelter without talking to the customer, what might have happened?

Being agile means embracing iterations and increments

How are they agile?

VISA wework

Nice to meet you

Understand agile and its use in education

Be able to use scrum to make your team agile

Pack a sprint

Our Objectives

What is "agile"?

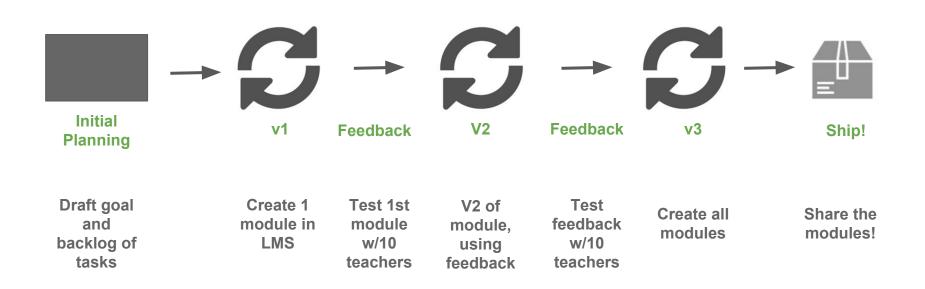

- Software development method
- Values incremental building
- Iterate and adapt: learnings, feedback
- Team-based decisions

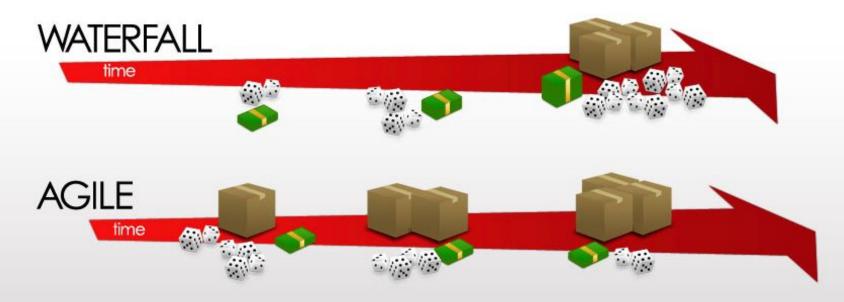

Yeah, but we don't build software

Software = final product

District Example:

"We need self-guided PD modules so people can build foundational knowledge about personalized learning."

Agile development uses an iterative approach to reduce risk and create products that are "launchable" throughout development.

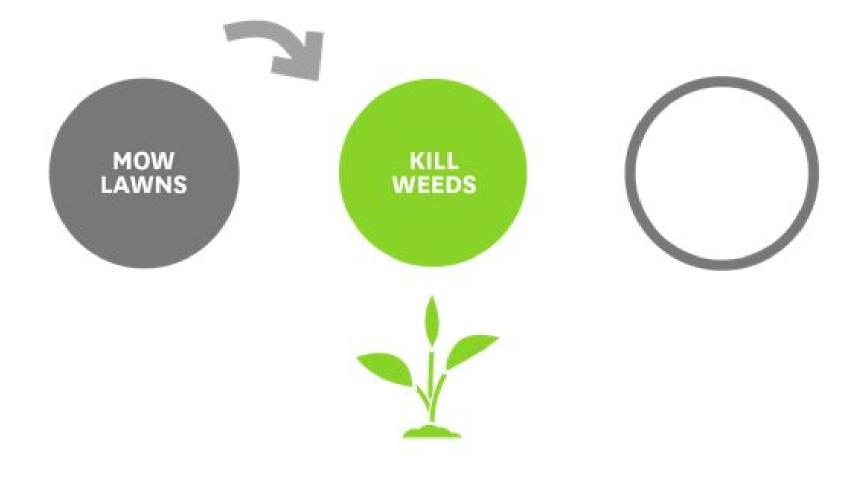

Reduce risk, increase value

Blue River Technology

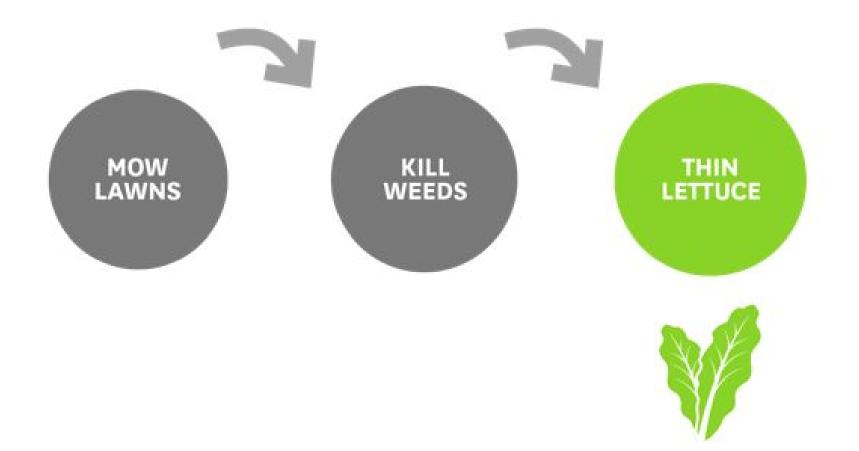

Based on article by Steve Blank, May 2013 Harvard Business Review: "Why the Lean Start-Up Changes Everything"

Blue River Technology

Based on article by Steve Blank, May 2013 Harvard Business Review: "Why the Lean Start-Up Changes Everything"

Think about some of the different needs across your district. Does it make sense to "go agile" for any of them?

Understand agile and its use in education

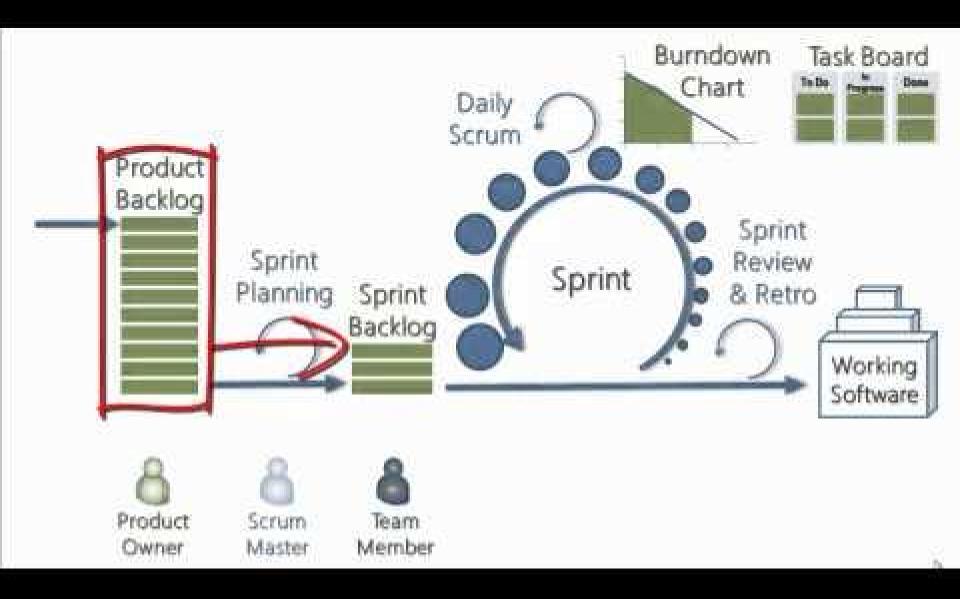

Be able to use scrum to make your team agile

Pack a sprint

Our Objectives

- Loosehead prop
 - 2nd row Blindside flanker
 - Number 8

 Hooker
 Tighthead pro
 2nd row
 Openside flanker

Scrum Roles

Product Owner

Define vision and roadmap, gathers needs, gets feedback

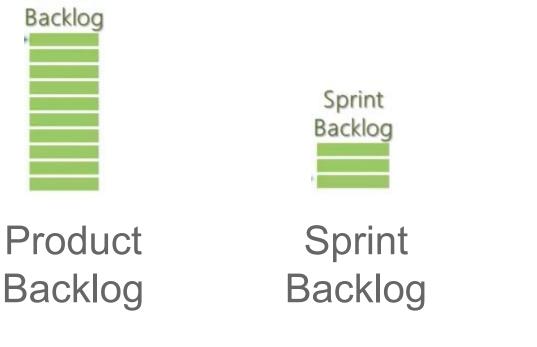

Scrum Master

Coaches team, facilitates meetings, enforces scrum practices

Team Members

Involves everyone needed to create the product, cross functional

Scrum Artifacts

Prioritized list of user needs and tasks; "the work"

Product

Short list of prioritized needs or tasks to be done during a sprint Report that shows complete and incomplete work

Burndown

Chart

Burndown

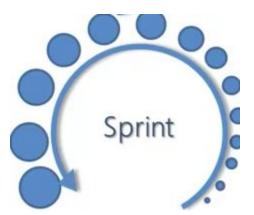

Chart

Scrum Ceremonies

Sprint Planning

Sprint Planning

Move items from backlog into sprint, based on priority and present knowledge

Sprint + Daily Scrum

Set period of time to deliver item of value; share yesterday, today, blockers Present new item(s); reflect, what to improve next time

Sprint

Review

& Retro

Review +

Retro

In a sprint, teams might create

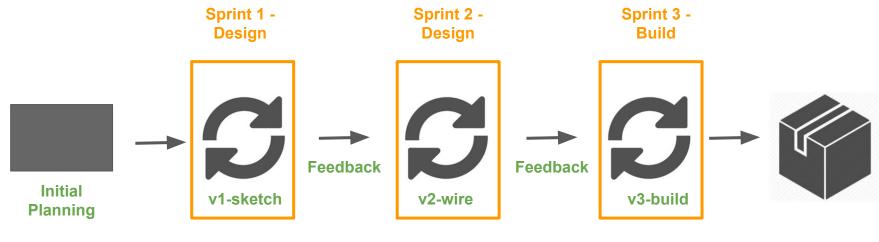

Software companies:

- 1. Facebook "like" button
- 2. Snapchat filter
- 3. Action list in Touchpoint

Schools and Districts:

- 1. State test plan
- 2. School garden
- 3. PD modules

Understand agile and its use in education

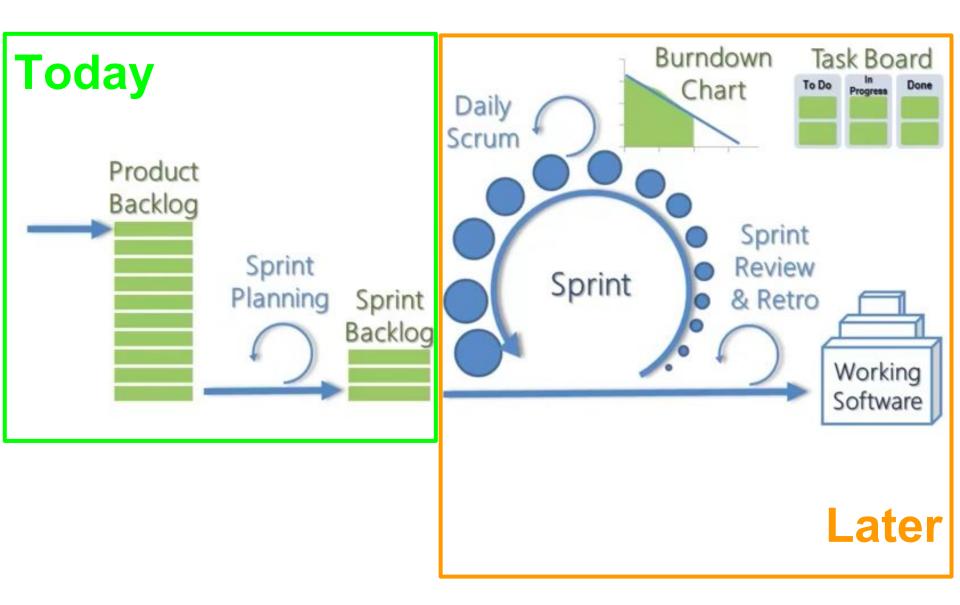

Be able to use scrum to make your team agile

Pack a sprint

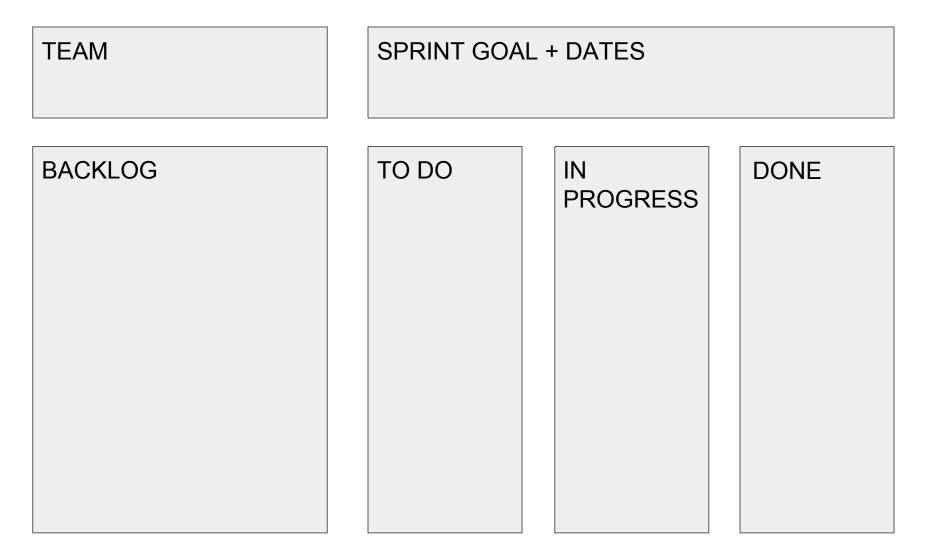

Our Objectives

Ok, we're going to apply this to your work now!

- 1. Goals Draft goal(s)
- 2. Team Set the sprint team and roles
- 3. Backlog Write out all of the needs and tasks
- 4. Prioritize Rank needs and tasks in priority order
- 5. Pack Set sprint goal and tasks
- 6. Sprint Do the work; meet daily

Create a sprint board w/your team

- 1. What do you need to accomplish in the next 3-6 months? Make a list.
- 2. Put that list in priority order. There are no ties.

Examples:

- Touchpoint Make it possible to add new actions in 3 seconds or less
- PD Module Create self-guided curriculum for new PL teachers

- 1. Look at your top goal, choose everyone who should be involved
- 2. Choose a Product Owner (vision, needs, priorities, backlog)
- 3. Choose a Scrum Master (facilitates, removes blockers)
- 4. Choose team members (everyone needed to do the work)

- 1. Look at your top goal.
- 2. Write out all of the actions you can think of that would need to be done in order to hit that goal. Be open, creative and go big.
- 3. One action per post it.
- 4. If you get done quickly, on to your second goal.
- 5. Add these post-its to your backlog.

- 1. Groom the backlog. Place post-its in order of importance.
- 2. Consider dependencies--are there some actions you have to do first, in order to do the rest?
- 3. If you see duplicate or similar actions, consolidate them.

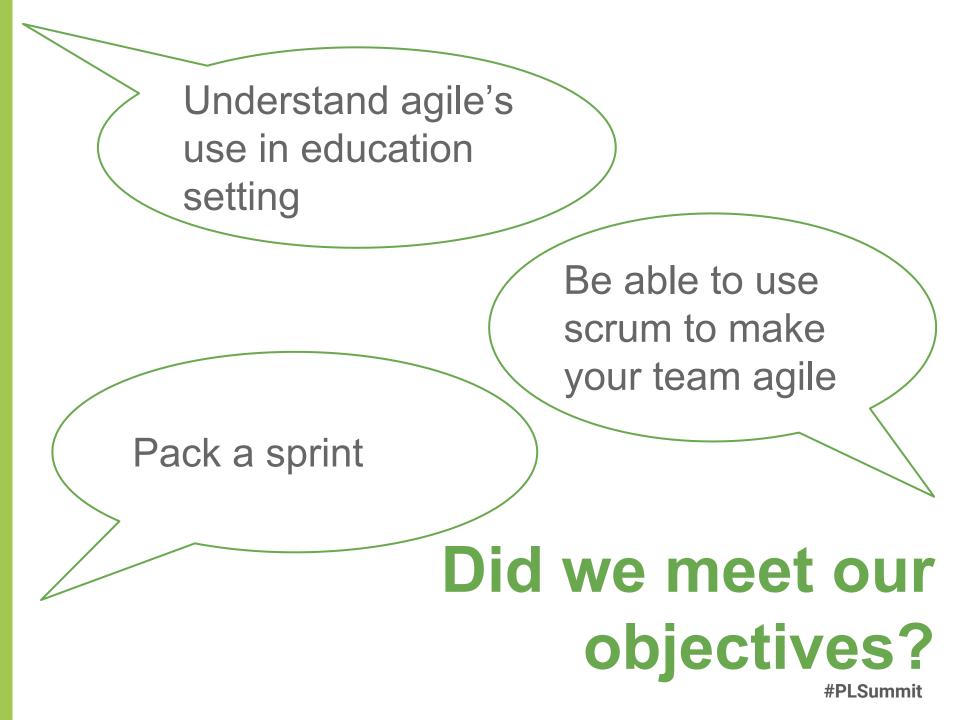

- 1. Write a short, 1 sentence sprint brief: At the end of this sprint our team will deliver _____, so that _____.
- 2. Move the post its into the "to do" column of your board.
- 3. Assign owners to each item.

Next Steps and Reflection

Next steps

- Complete your first sprint
- Put release date on your calendar!
- What else?

Reflect

- What challenges might you face, how will you get around them?
- How might scrum help your team?
